

The background of the entire image is a close-up, artistic shot of a welding process. Bright, glowing orange and yellow sparks are flying out from a central point, creating a dynamic and industrial atmosphere. The sparks are captured in motion, appearing as streaks of light against a dark background.

ABOUT WELDEX

Weldex – the largest in Russia by the number of exhibitors and visitors international exhibition of welding materials, equipment and technologies.

Leading manufacturers and suppliers of welding products demonstrate their latest developments, run constructive business negotiations with potential customers, conclude new contracts, expand sales geography, maintain relationships with partners and exchange opinions with experts.

EXHIBITION SECTIONS

- Equipment and materials for welding
- Metal cutting equipment
- Industrial robots
- Equipment and materials for applying protective and hardening tools
- Equipment for quality control of welded joints
- Welding personal and collective protective equipment
- Edge processing equipment
- Soldering equipment
- Technical gases

FASTENEX

Weldex is accompanied by Fastenex, new international exhibition of fasteners, fittings and tools. This is the only B2B show of fixing industry in Russia.

EXHIBITORS

123
exhibitors

from

10

countries

Countries that presented their companies at the exhibition in 2022: Russia, the Republic of Belarus, Turkey, China, India, Pakistan, Germany, Italy, the Czech Republic, Switzerland.

EXHIBITORS PROFILE

Russian and international manufacturers and suppliers of equipment, materials and tools for welding, metal cutting, soldering, industrial automation, protective and hardening coatings, edge processing, quality control of welded joints, as well as fasteners, hardware and protective equipment during welding.

BUSINESS PROGRAM

12

events

55

speakers

373

visitors

Weldex 2022 business program was 3 rich days of conferences, sessions, discussions and master classes, where recognized experts shared their knowledge of the current state of the market, forecasts for the future, talked about new technologies and best practices in various areas of the welding industry.

The discussions of import substitution, parallel imports, automation of welding processes, specific features of state regulations and harmonization of standards in the field of welding manufacturing, features of welding of various types of metal and many other important topics were touched upon in the program and attracted maximum attention of visitors.

EXHIBITION PROFESSIONAL CONTESTS

67
exhibitors

from **14**
Russian regions and Belarus

12
winners

Weldex 2022 hosted the professional competency competitions "Best Welder" and "Woman in Welding" (for the first time!), which determined the best of the best among welding industry specialists.

The winners and finalists were announced on October 13 at the bright awarding ceremony in the Conference Hall of the exhibition.

The background of the entire image is a close-up, high-contrast photograph of a welding process. Bright, glowing orange and yellow sparks are being ejected from a central point, creating a dense, dynamic pattern of light against a dark background. The sparks appear as long, thin streaks radiating outwards, with some brighter, more concentrated points of light.
